

LET'S FACE IT

Examples and Information

Several factors determine the cost of your design, including the location, size, and complexity of design. Below is a general price reference. Please submit a photo of a design you'd like me to use as a reference and I can give you a specific quote.

1. Location/Size

- Fingers
- Hand
- Hand and Wrist
- Fingers to Elbow
- Fingers to shoulder

Fingers, one hand
Approx. \$15-20

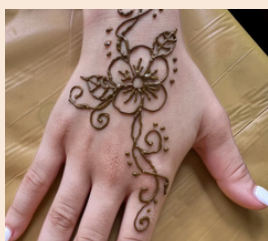

Hand and Wrist
Approx \$30 per hand

Fingers to mid-forearm
Approx \$80 per arm

2. Complexity

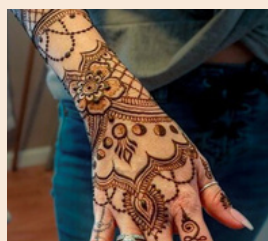

- Simple
- Medium
- Complex

Simple Design, One Hand
Approx. \$15

Complex Design
Fingers to Elbow
Approx. \$120 Per arm

Medium Complexity,
Fingers to Elbow
Approx. \$80

3. Other Options

- Palm
- Inner arm
- Blackout Areas

Blackout Areas, Complex
Hand and Wrist
Approx. \$50

Palms
approx \$40 each

Blackout Fingertip Example
Approx. \$35 each hand

More Info

- There is a \$50 minimum spend per appointment (not per person) Multiple people can have henna done at one appointment to satisfy the minimum spend.
- Henna takes time! Applying large and/or intricate designs cannot be done quickly
- Long-lasting and deeply-colored henna is dependent upon your skin's preparation, how long you allow the stain to absorb, and your aftercare. See the Additional Information for Prep and Aftercare instructions.
- Once the dried paste is removed, the color appears a light orange. After 24-48 hours, the color deepens to its final, reddish-brown color.
- I only apply henna to hands/arms
- I only use traditional henna; I do not use Jagua (black henna)

LET'S FACE IT

Prep & After Care

FOR HENNA ART

Pre-Appointment

To allow for the deepest, most long-lasting henna stain possible:

- Exfoliate the area well
- Consider removing hair in the art area
- Avoid lotions, oils, and moisturizers for several days beforehand

Before Paste Removal

- Leave the paste on for as long as possible, ideally 6-8 hours, or even overnight for a deeper stain
- To keep your mehendi moist and encourage a darker color, you can apply a mixture of lemon juice and sugar to your DRIED paste. The acidity of the lemon helps to oxidize the henna, while the sugar keeps it hydrated. Leave this mixture on for a few hours or overnight for best results
- Keep warm - this will help with further dye release

Paste Removal

- Do not wash paste off with water; instead, scrape or brush the dry paste off.
- The henna stain will initially appear orange and gradually darken to a reddish-brown over the next 48 hours

Henna Paste Applied

Immediately After Removal

24-48 hrs After Removal
